Virginia Department of Social Services

Diligent Recruitment and Retention Plan

2019-2024

2021 update

Introduction

Virginia's social services system is state supervised and locally administered, with the Virginia Department of Social Services (VDSS) providing direction, oversight, and support to the 120 local departments of social services (LDSS) which serve the children and families of Virginia. VDSS partners with the LDSS, and faith-based and non-profit organizations, to support the continuum of placement services and provide resources to temporarily meet the needs of children while their parents work to address the issues which brought the children into care. LDSS and Licensed Child Placing Agencies (LCPA) are responsible for approving foster and adoptive families based on specific Code requirements and regulatory standards. Virginia's resource families are dually approved to foster and when appropriate, adopt, and the approval process is a mutual endeavor between the LDSS or LCPA and the family requesting approval.

The Virginia Children's Services Practice Model

The Virginia Children's Services System Practice Model sets forth a vision for the services that are delivered by all child serving agencies across the Commonwealth, especially the Departments of Social Services, Juvenile Justice, Education, Behavioral Health and Developmental Services and the Office of Children's Services. The practice model is central to all decision-making, present in all meetings, and in every interaction that takes place with a child or family.

- We believe that all children and communities deserve to be safe.
- We believe in family, child, and youth-driven practice.
- We believe that children do best when raised in families.
- We believe that all children and youth need and deserve a permanent family.
- We believe in partnering with others to support child and family success in a system that is family focused, childcentered, and community-based.
- We believe that how we do our work is as important as the work we do.

Virginia's practice model aligns with VDSS' commitment to improve foster care practices in Virginia and its mission to protect children and promote healthy families. By strengthening partnerships with public and private child welfare

agencies and key stakeholders VDSS will promote a kin first culture that prioritizes placement of children in family based settings.

Alignment

As part of VDSS' goal to strengthen Virginia's Child Welfare system there have been ongoing, statewide efforts to provide local departments with supports and tools needed to increase the pool of available foster homes. The Child and Family Services Review conducted in 2017, the subsequent Program Improvement Plan and most recently the Joint Legislative Audit and Review Committee completed in 2019, have provided clear direction for Virginia to implement a Diligent Recruitment Strategic Plan.

CFSR/PIP

Conducted between April 1, 2017 and June 1 2017 the third round of the Virginia's Child and Family Services Review (CFSR), indicated that although progress was made towards improving Virginia's child welfare system, there remain significant areas in need of improvement. VDSS's CFSR Program Improvement Plan (PIP) identified areas of concern to include:

- Foster families who can provide for the identified needs of the child;
- Placing children with relatives while in Foster Care;
- Moving children from Foster Care to permanency; and,
- Achieving permanency in a timely manner.

Review of placement data for the cohort of children who entered and exited care from July 2011 through March 2017, showed 40% of children with one placement, 21% of children with two placements, and 20% of children with three or more placements. The data further showed that the number of placements went up as the child's length of time in care increased; although this aggregate number would also include cases where placement changes were related to the goal.

A significant need, as identified by LDSS staff, are foster home placements for teenagers (approximately 38% of the foster care population) with foster parents who are trained and have supports necessary to meet the needs of older children (e.g., intensive case management, specialized services for children, etc.). LDSS supervisors and workers participated in Town Halls across the state and also reported that they struggle to find appropriate foster home placements for sibling

groups, African American children and youth (approximately 30% of the foster care population). It was further reported that treatment foster care homes are no better equipped to support children who exhibit difficult behaviors than are locally approved foster homes resulting in many children being placed in congregate care facilities.

The lack of data related to the number of locally approved homes and treatment foster care homes along with the lack of information related to the age and needs of children in foster care is a significant barrier to ensuring that all children who enter foster care in Virginia live in a family. Virginia also does not have aggregated racial or ethnic demographic data for resource families. As a result, the state is unable to ensure that the pool of resource families reflects the racial and ethnic diversity of the children needing foster and adoptive homes.

Strategy 3.2 in the PIP specifically addresses these issues through a comprehensive Diligent Recruitment Strategic Plan developed by a workgroup made up of state/regional staff, LDSS staff, stakeholders and foster parents. This plan is intended to address data collection to allow Virginia to determine the number and types of foster and adoptive homes needed as it relates to the foster care population.

Adoption Call to Action

The Division of Families Services Practice Program areas: Foster Care, Adoption and the Resource Family programs aligned division outcomes and resources along with Virginia's five year Child and Family Services Strategic Plan, Child and Family Services Review (Program Improvement Plan), and Virginia's Diligent Recruitment Strategic Plan to develop Virginia's plan for the Adoption Call to Action Initiative (ACTA).

Regional Permanency Practice Consultants conducted a review of the cases of all children placed in congregate care and identified 550 children who were placed in congregate care not due to medical necessity. Of those children Virginia identified 33 children under the age of 12, for who termination of parental rights has been obtained and have the goal of adoption. The 33 children became the focus of the ACTA. Over the course of nine months, the ACTA initiative was managed by the Adoption Policy Specialist. Due to the complexity of the cases and limited time of the initiative, the goal was to have 40% or 13 of the 31 youth placed in prospective adoptive homes by December 2020. The regional Adoption Negotiators worked with their regional peers; permanency practice consultant and resource family consultants along with the LDSS monthly to monitor progress of placing youth safely in prospective adoptive homes. Of the 33 children in the

ACTA initiative; 23 (70%) identified an adoptive family or have been placed with an adoptive family. Below is a regional breakdown:

| Region | # children identified | # children placed/visiting |
|----------|-----------------------|----------------------------|
| Central | 8 | 8 |
| Eastern | 3 | 2 |
| Northern | 9 | 5 |
| Piedmont | 8 | 3 |
| Western | 5 | 5 |

Joint Legislative Audit and Review Committee (JLARC)

In December 2018, JLARC submitted the report <u>"Improving Virginia's Foster Care System"</u>, which highlighted the need for the state to invest in a resource family program with the goal of ensuring that every child in foster care lives in a family. In particular, the report identified a lack of a strategic plan for recruiting foster families and a lack of a statewide inventory of foster families as failings in the current system. The report made the following recommendations for the General Assembly to consider for foster family recruitment and retention efforts:

RECOMMENDATION 4 The Virginia Board of Social Services should promulgate regulations to require staff of local departments of social services to at least annually conduct a search for relatives of every child who (i) is not placed with relatives and (ii) has no clear permanent placement options. The amended regulation should further require that relative searches be conducted when a child's placement changes, if such a search has not been conducted in the 90 days prior.

RECOMMENDATION 6 The Virginia Department of Social Services (VDSS) should issue clear guidance that presents the options available to local departments of social services to facilitate the approval of relatives to serve as foster parents. Guidance materials should be issued to all local departments and regional VDSS staff.

RECOMMENDATION 7 The General Assembly may wish to consider amending Title 63.2, Chapter 9 of the Code of Virginia to require every local department of social services to provide semiannually to the Virginia Department of Social Services a list of all licensed foster families who reside in their locality. The list should, at a minimum, include foster families' contact information, preferences regarding the age, number, and needs of children each family would consider

fostering, key demographic information for each family, the number and ages of children each family is currently fostering, the total number of other children in each family's home and their ages, and biological relationships (if any) between each family and the children they are fostering.

RECOMMENDATION 8 The General Assembly may wish to consider including language in the Appropriation Act directing the Virginia Department of Social Services to develop and maintain a statewide strategic plan for recruiting and retaining foster families.

RECOMMENDATION 9 The General Assembly may wish to consider including language in the Appropriation Act to establish six positions—five regional staff and one at the central office—at the Virginia Department of Social Services responsible for implementing the statewide strategic plan for recruiting and retaining foster families and supporting local recruitment and retention efforts.

RECOMMENDATION 11 The General Assembly may wish to consider including language in the Appropriation Act directing the Virginia Department of Social Services to (i) conduct an immediate review of the circumstances of every child in foster care currently in congregate care, to identify children who do not have a clinical need to be in congregate care; (ii) communicate its findings to each local department of social services; (iii) direct the local departments to make concerted efforts to identify appropriate family-based placements for these children; and (iv) direct the local departments to move identified children to an appropriate family-based placement, if feasible.

Virginia's Response to JLARC Recommendations

Based on JLARC's recommendations a Diligent Recruitment Workgroup comprised of supervisors from five local departments along with representatives from the Capacity Building Center for Sates, Newfound Families, and Virginia's Kids Belong, the Governor's Office/VA Fosters, VDSS Regional Practice Consultants and Home Office staff was organized in early 2019. The workgroup was convened to begin developing a data-driven strategic recruitment and retention plan that prioritizes placement of children who enter foster care with relatives whenever possible. Prior to the release of the JLARC report, VDSS had begun data clean-up of its current Online Automated Services Information System (OASIS) to address the lack of accurate Resource Family data. These efforts will continue as VDSS moves toward developing a more reliable data base to track key demographic information of all foster families statewide.

The 2019, General Assembly Budget Appropriation Act allocated funding to hire a Resource Family Program Manager along with five Regional Consultants. Virginia has since filled these positons and now has a Program Manager and a dedicated staff member in each of its five regions to support local recruitment and retention efforts. In March 2020, the Resource Family Policy Specialist position became vacant and went unfilled for the remainder of the calendar year as Virginia implemented a hiring freeze. The Division of Family Services moved quickly to fill vacant positions when the hiring freeze was lifted and the Policy Specialist position was filled in March 2021.

The Office of the Governor established the Virginia Fosters initiative with the goal of approving 1000 new foster families. In May 2020 the position of Director became vacant and remains unfilled; however, the employee work profile (EWP) is currently under review and Virginia will move to fill the position within the coming months. Virginia Fosters will partner with LDSS to develop recruitment plans in order to expand the pool of foster families statewide.

FEDERAL REQUIREMENTS OF THE MULTI-ETHNIC PLACEMENT ACT (MEPA)

Virginia is required to comply with federal laws that promote the best interests of children by ensuring that they have permanent, safe, stable, and loving homes that will meet their individual needs, without regard to the child's or the prospective parent's race, color, or national origin. The Multi-Ethnic Placement Act (MEPA) of 1994, as amended, prohibits the delay or denial of any adoption or placement in foster care due to race, color, or national origin of the child or the foster or adoptive parents. It also requires States to provide for diligent recruitment of potential foster and adoptive families who reflect the ethnic and racial diversity of children for whom homes are needed. To meet MEPA's diligent efforts requirements, States must have a comprehensive plan detailed that includes:

- 1. A description of the characteristics of waiting children;
- 2. Specific strategies to reach all parts of the community;
- 3. Diverse methods of disseminating both general and child-specific information;
- 4. Strategies for assuring that all prospective parents have access to the home study process, including location and hours of services that facilitate access by all members of the community;
- 5. Strategies for training staff to work with diverse cultural, racial, and economic communities;
- 6. Strategies for dealing with linguistic barriers;
- 7. Non-discriminatory fee structures; and

8. Procedures ensuring a timely search for prospective parents awaiting a child, including the use of exchanges and other interagency efforts, provided that such procedures ensure that the placement of a child in an appropriate household is not delayed by the search for a same race or ethnic placement.

Plan Development Process

VDSS' Child and Family Services Review (CFSR) Program Improvement Plan (PIP) meetings began in 2018. Initially these meetings consisted of the VDSS Executive State Leadership team. The Executive team reviewed past and current initiatives to ensure that recommendations and requirements outlined in the CFSR/PIP, CFSP, JLARC and Family First Act, would align with the Diligent Recruitment Plan (DR). During the progression of these meetings internal and external stakeholders were invited to join the PIP meetings to gather their input in developing the statewide strategic DR plan. A DR Advisory Committee was convened which included state and local child welfare staff and private providers. Through these collective efforts of state and local child welfare staff, key stakeholders, and private providers, focus groups were convened to assist in the development of a strategic diligent recruitment and retention plan. Additional input and recommendations were gathered from the Youth Advisory Board; which consists of current and former youth in foster care, to gain a better understanding of the types of families needed. The DR Advisory Committee led to the development of a smaller DR workgroup that was charged with developing a DR five (5) year Strategic Plan. This workgroup in collaboration with the Capacity Building Center for States (CFS) continued working on the development and implementation of the DR plan.

By utilizing a root cause analysis, specific barriers to recruitment of foster families were identified and addressed through the development of goals and strategies. A diligent recruitment plan was created that will support a significant increase in kinship placements while also supporting recruitment and retention of foster and adoptive families.

Problem Statement and Theory of change

Problem: Children/youth in foster care in VA are not always placed in a family-based setting/placement that is able to meet their needs- resulting in siblings being separated and older youth residing in congregate care settings. Specifically, AA children and youth and children/youth with special needs are not being placed in families that can meet their needs.

Diligent Recruitment Strategic Plan Theory of Change

VDSS/LDSS will systemically utilize a structured diligent recruitment and retention process (policy and guidelines), apply training skills and provide specialized foster parent supports so workers have the ability to assess, train and make appropriate placements

And

Improve state-wide capacity to collect data in order for staff to use data-driven decision-making pertaining to placement

So that

VDSS/LDSS use the skills, tools, process, data to identify kinship and foster families that can meet the needs of sibling groups, minority children, older youth, and children/youth with specific needs and the types of families needed in the geographic areas where they are most needed

So that

Recruitment efforts can be targeted to increase the availability of the right families where they are needed with kinship placement being the first priority

And

Workers will immediately assess and quickly approve kinship and foster families

So that

Children are placed with the right families in the right geographic areas who can meet the child/youth's specific needs

And

Families receive specific supports to meet the needs of the children in their homes.

Goal: All children/youth in foster care in Virginia (especially AA, older youth, and children with special needs) will live in a kinship or foster family that will meet their needs, and children/youth will benefit from their connections to their siblings, families, and communities.

Characteristics of Children in Care

The tables below provide demographic data and characteristics of the children placed in Virginia's foster care system. As of 12/31/20, there were 5,738 children in foster care, 4,713 children age 18 and younger. The largest racial makeup of children in foster care continue to be black or white and continue to be between the ages of one and five. While Virginia continues to use data to drive recruitment efforts and strategies to recruit, train and approve foster parents equipped to meet the diverse racial ethnic and cultural needs of children in foster care, prioritizing placing children who enter foster care with relatives will continue to be prioritized. The demographic characteristics of children in foster care, particularly those in congregate care will be the focus of strategic recruitment campaigns during 2021.

Table 1

Race of children in Foster Care

| Year | Black | Percent Black | White | Percent White | Am Indian Alaskan Native | Percent Am Indian Alaskan Native | Asian | Percent Asian | Hawaiian Pacific Islander | Percent Hawaiian Pacific Isl | Multi- race | Percent Multi- race | Hispanic | Percent Hispanic |

Calendar Year 2020

Despite the impact of the Covid-19 pandemic Virginia experienced significant progress in the development of a Kin First culture within its child welfare system. Overall the number of approved foster families increased by 1,311 families and the percentage of children placed in foster care rose to 75% compared to 72% in 2019. As reviews of children in congregate care continued throughout 2020, the percentage of children placed in congregate care decreased from 12% in 2019 to 7.9% by the end of December 2020. Finally children in foster care who are placed with relatives increase from 6% in

2019 to 8.1% during 2020. Thus far in calendar year 2021, Virginia has seen 18% of children entering foster care be placed with relatives.

As Virginia continues to invest in placing children with relatives, we also recognize that foster families continue to play an important role in keeping children connected to their families and home communities when they enter care. Recruitment of foster families during 2021 will continue to utilize data related to the children placed in congregate care to develop messages and strategies that raise awareness of Virginia's need for foster and adoptive families to care for those children. Virginia will also invest in developing its current pool of approved foster families by offering access to in service training opportunities that will enhance the ability of foster families to support a broader age and need profile of children in foster care. Finally, Virginia will continue to engage its private partner agencies (LCPA) to facilitate the development of supportive services that are available to local departments to utilize in ensuring that all kinship foster parents have the support and resources they need to care for children.
