End the problem of youth in foster care sleeping in offices

To address long-standing and recent challenges, including placement disruptions and high-acuity youth in foster care sleeping in local offices or other unsuitable locations, Governor Youngkin launched the Safe and Sound Task Force on April 1, 2022.

Address underlying root causes and foundational issues

Long term the Task Force seeks to identify and address underlying root causes and foundational issues contributing to the problem

The Task Force brings together state, local, and private partners for a multi-system approach because these are “all of our kids” and a coordinated, aligned response is necessary

Multi-system, multi-sector

Solution-Oriented

We are using new and existing services, models, programs, and ideas to resolve the problem and address underlying causes.
